

# Dragos Ene

GBS Engineer

ERATOSTHENES Centre of Excellence

Country of Origin: Romania

## Academic Interests Research Journey

"Engineer, graduated from the Politehnica University of Bucharest, Faculty of Electronics, Telecommunication and Technology Information, specialisation in Applied Sciences - Physics Engineering in 2007. In 2011 I've received the title of Doctor in the field of Physics from the same University, the topic of the thesis being Remote Sensing on Cultural Heritage".

"Since 2015 my research is focused on active and passive remote sensing of the atmosphere, and I've participated in or coordinated different ground-based or airborne campaigns to study atmospheric dynamics, assess air pollution emissions, or for the validation of different space missions".

*"I've chosen ERATOSTHENES CoE for the centre's objectives, for its vision of development in the EMMENA region, because it offers **state-of-the-art research infrastructure**, it has a strong collaboration with important European research institutions, and for the scientific background of the people involved in the centre".*
